PROFILE

Reliable and committed Software Engineer with full-stack development experience building scalable web applications using ReactJS, JavaScript, Node.js, Java, and Python. Skilled in RESTful API design and integration across enterprise applications, relational databases (MySQL), and Agile delivery environments.leveraging AI-assisted coding tools (GitHub Copilot, ChatGPT, Claude AI) to improve code quality and development productivity. Strong communication skills with a track record of reliable, production-ready delivery through structured code reviews and cross-functional collaboration.

TECHNICAL SKILLS

Languages JavaScript (ES6+), Java, Python
Frontend ReactJS, HTML5, CSS3, Redux, Context API, Responsive UI,front-end development
Backend Node.js, Express.js, REST APIs
Databases MySQL, MongoDB
Tools Git, GitHub, Postman, VS Code, Eclipse,GitHub Copilot, ChatGPT, Claude AI
Concepts OOP, DSA,SDLC, DBMS,Production Support,Code Reviews

EXPERIENCE

Software Development Engineer Jun 2025 – Present
Innovestigia · Jabalpur, MP

- Designing and building secure, high-performance browser-based frontend systems for a role-based Gate Entry Management System using ReactJS and Redux, delivering multi-role dashboard experiences with modular, reusable UI components and centralized state management,reducing component re-renders by 30% through optimized Redux state design.
- Implemented JWT + RBAC authentication flows ensuring independently secured access across all UI components — aligning with industry-standard quality and security practices.
- Leveraged AI-assisted coding tools (GitHub Copilot, ChatGPT, Claude AI) to accelerate debugging and improve code quality, increasing development productivity by an estimated 25.
- Designed and integrated RESTful APIs between frontend and backend services, enabling secure and reliable data exchange across enterprise applications.

Java Developer Intern Jul 2024 – Sep 2024
Anudip Foundation · Jabalpur, MP

- Built Java modules using JDBC, SQL, and DAO pattern; applied OOP principles with robust input validation and exception handling, reducing runtime errors and improving code reliability.

PROJECTS

DataSphere — Real-Time Data Analytics Platform GitHub | Live
MERN, Socket.io, JWT

- Full-stack analytics platform with MVC architecture, JWT + RBAC authentication, and real-time Socket.io dashboards; CSV ingestion pipeline with 100% success rate and MongoDB aggregation reducing query time by ~40%.
- Collaborated with cross-functional stakeholders to gather requirements; maintained code quality through structured reviews and modular component design.
- Designed scalable REST APIs with Node.js and Express.js serving real-time data to front-end dashboards, supporting concurrent multi-user sessions with JWT-based authentication.

JobSpark — AI-Powered Job Portal GitHub
ReactJS, Node.js, MongoDB, MySQL, Socket.io, JWT

- Built AI resume matching using TF-IDF + cosine similarity; dual-database (MongoDB + MySQL), RBAC, real-time Socket.io notifications, and recruiter analytics dashboards via Recharts.
- Implemented responsive front-end UI components using ReactJS and CSS3, ensuring cross-browser compatibility and mobile-first design across all application screens.

EDUCATION

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.57 2020 – 2024
Takshshila Institute of Engineering and Technology, Jabalpur

CERTIFICATIONS

ReactJS Internship — Robotronix India (2023): Intensive training on React fundamentals, hooks, state management, and component lifecycle with hands-on projects.
